- Height at maturity: 2'–3'
- Length of stand: 4–5 years

---

This alfalfa/grass mix was assigned with equine nutrition in mind. It can be grazed or cut for hay.

---

Enduro-Plus consists of only the best forage varieties available. All varieties in the Enduro-Plus product line have been developed and tested for forage quality, yield, and persistence. These products have been designed to give you higher relative feed values, which translates into more milk per acre, more beef per acre, or more energy for horses.
