

Showplace Mix

FORMULATION

- 80% Proprietary Kentucky Bluegrass (4 elite varieties)
- 20% Proprietary Perennial Ryegrass (elite variety)

NOTABLE CHARACTERISTICS

- Highest turf quality for your showplace
- Excellent performance in well maintained lawns
- Excellent disease resistance
- Use in full sun to partial shade
- Dark green color with fine blade
- Requires moderate-high levels of fertilizer & water

Showplace Mix is made up of elite Kentucky Bluegrass varieties with 20 percent elite Perennial Ryegrass also in the mixture. Showplace Mix includes only varieties that have excellent to very good ratings in NTEP* trials for disease ratings, genetic color, density and over-all turf quality. Showplace Mix is an excellent blend for new lawns or for interseeding into established lawns.

SEEDING RATE

New Lawn 4-5 lbs/1,000 sq. ft. or 200 lbs/A
Overseeding 4-5 lbs/sq. ft.

Sunlight needed	Full Sun-Partial Shade
Soil Types	Clay to Sand
Maintenance	Medium-High
Fertility	Medium-High
Traffic	Good

NOTES ON PROPRIETARY KY BLUEGRASS:

Kentucky Bluegrass is the most popular type of lawn grass in the Midwest. Proprietary bluegrass varieties are very dark green and beautiful. Kentucky Bluegrass also mixes well with ryegrass to provide a very nice lawn. Bluegrass takes the most maintenance of any turfgrass and will go dormant before ryegrasses and tall fescues. Bluegrass generally germinates in 20-25 days.
