

Tuff Turf Blend

FORMULATION

100% Proprietary Turf-Type Tall Fescue
(3 rhizomatous type varieties - eg. SRP, LS, AST)
Lateral spread/self-repairing cultivars

NOTABLE CHARACTERISTICS

- Excellent performance and turf quality
- Dark green color with finer leaf blades
- Use in full sun or partial shade
- Improved drought tolerance
- Excellent disease resistance
- Medium maintenance required
- Only overseed into Turf Type Tall Fescue lawns

Tuff Turf Blend provides a beautiful, dark, lush green lawn...sun or shade! Turf-Type Tall Fescue is becoming much more popular as new varieties are darker green and finer bladed. The elite varieties that qualify for the Execu-Turf program are very dark and lush. Tuff Turf includes only varieties that have excellent to very good ratings in NTEP* trials for disease ratings, genetic color, density and over-all turf quality. Tuff Turf is an excellent blend for new lawns.

SEEDING RATE

- New Lawn 8-10 lbs/1,000 sq. ft. or 425 lbs/A
 - Overseeding 4-5 lbs/sq. ft.
- (Note:only overseed into Tuff Turf or other tall fescue lawns)

Sunlight needed	Full Sun-Partial Shade
Soil Types	Clay to Sand
Maintenance	Medium
Fertility	Medium
Traffic	Very Good

NOTES ON TURF-TYPE TALL FESCUE:

Known as a durable, drought tolerant grass that is much more dark green and fine bladed than the tall fescues of the past. Elite varieties in this blend have a very dark green color with excellent turf quality; similar to Kentucky Bluegrass and Turf-Type Perennial Ryegrass.
